Claims 102 and 103 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Alam et al.* in view of *Kat* and further in view of *Letovsky et al.*

**REJECTIONS UNDER 35 U.S.C. § 103(a)**

**CLAIMS 111, 117, 118, and 119**

Claim 111, recites in part, the features:

“decomposing each of said one or more input multi-media files into multi-media type primitive components;  
converting each of said multi-media type primitive components into corresponding intermediate format components; and  
integrating said intermediate format components into a single output presentation file corresponding to each target format of the plurality of target formats.”

Claim 111 includes the limitation of “decomposing each of said one or more input multi-media files into multi-media type primitive components.” First of all the technology in *Alam* relates to converting a text document or an image document (i.e., bitmapped document) into another format for display. See Abstract. Thus, *Alam* has nothing to do with converting several multi-media files as in the instant application. Because *Alam* does not deal with multi-media files, *Alam* does not disclose decomposing the multi-media files into multi-media type primitive components. Examples of the multi-media type primitive components are audio, video and animation primitives. In contrast, *Alam* merely discloses grouping the data that is in an input document into intermediate format blocks. *Alam* discloses grouping the data into intermediate format blocks because *Alam* has to manipulate **only text and bitmapped files and NOT multimedia files** which include audio, video, animation, and graphics components.

Further, Claim 1 integrates the multi-media type primitive components from several multi-media files into a single output file. In contrast, *Alam* merely discloses converting a single text or bitmapped input file.

It is respectfully submitted that Claim 1 is allowable because *Alam* neither anticipates nor makes obvious the limitations of claim 1.

Claims 118 and 119 contain limitations that re similar to Claim 1. Thus, Claims 118 and 119 are allowable for at least the reasons proffered herein in respect to Claim 1.

#### CLAIMS 112-116

Claims 112-116 are directly dependent upon Claim 111 and include all the limitations of Claim 111 and therefore are allowable for at least the reasons provided herein in respect to Claim 111.

Furthermore, it is respectfully submitted that Claims 112-116 recite additional features that independently render Claims 112-116 patentable over the art of record. Thus, it is respectfully submitted that Claims 112-116 be held in condition for allowance.

## **CONCLUSION**

For the reasons set forth above, it is respectfully submitted that all of the pending claims are now in condition for allowance. Therefore, the issuance of a formal Notice of Allowance is believed next in order, and that action is most earnestly solicited.

If in the opinion of the Examiner a telephone conference would expedite the prosecution of the subject application, the Examiner is encouraged to call the undersigned at (650) 838-4311.
